

Our Affiliate has worked directly and/or indirectly for several years with Crossroads Mission for our wall packages and the money to purchase the trusses for our homes. We have found them to be very helpful and willing to work with us to meet our needs. They have helped redesign some plans to better suit our needs, have been flexible with our schedules as much as possible and been a pleasure to work with in all areas. It is a real financial assistance for us to be able to utilize their program as well as knowing that they coordinate all aspects if needed. In my three years on staff we have yet to use the same floor plan for any of our homes and they have always been very accommodating in working with us to get us what we need.

I can only give positive feedback for this program as all of our experiences have been more than positive and the staff that we have worked with has been so accommodating and friendly to work with that it makes the decision to return each year a snap. One of the best and easiest ways I can recommend to get your build off to a positive start.

I would be more than happy to discuss any questions anyone might have regarding our experience.

Sincerely,

*Valorie Williamson*
